WMF Dynamic Milk allows you to prepare hot and cold foamed milk drinks from the single machine, allowing you to increase your product line, with minimal staff training.

The WMF Plug&Clean system is the only fully automated and HACCP certified milk cleaning system on the market. This a patented technology and exclusive to WMF.

Both coffee and hot water dispensing can be run simultaneously at any time, ensuring the perfect balance of speed and consistently high quality.

The spout height of the WMF 5000 S+ automatically adjusts to every preset stored for the recipe. The automatic height adjustment function is available as standard in all WMF 5000 S+ machines.

The 5000S+ is more environmentally friendly with reduced energy consumption, fewer chemicals and almost entirely recyclable. WMF is an ISO 14001 Certified brand.

Data backup, software updates and cleaning protocol downloads – download and set with a USB stick, in line with HACCP-compliant operation.

The patented SteamJet warms every cup with steam in the shortest possible time – this means that beverages remain hot for a long time, guaranteeing perfect coffee indulgence.

The 5000S+ features an LCD menu system that can be customised for self service, food service operations and is brandable.

Large, removable, lockable product hoppers. The coffee bean hoppers are dishwasher-proof. Ideal for easy cleaning.

The intelligent Dynamic Coffee Assist permanently guarantees the highest quality, once the beverage quality has been set, it is continuously monitored and are automatically adjusted if necessary.

The innovative Dynamic Milk Assist continuously monitors the milk temperature and flow and can also reliably detect when the milk is empty, even with Bag-in-Box systems.

**WMF NZ have a NZ wide** sales & service network with trained service engineers. WMF can provide forecasted service costs for all models.
